

Possible Mission Opportunities with our MK4 aircraft

- * Hazard warning, rescue and assessment
- * Agricultural Surveillance
- * Wildlife conservation
- * Aerial construction assessment
- * Industrial inspection
- * Video and Film

Mobius

24-hour Solar UAV

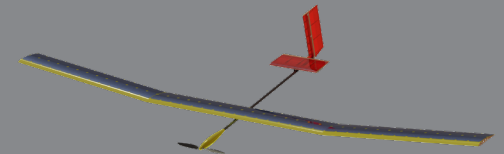

Mobius is a company determined to bring solar powered UAVs to the market. Mobius has created a solution to overcoming the challenges with solar-powered flight and creating a UAV to support long endurance flight missions.

Solar Flight is attracting attention from the public because it is proving to be environmentally friendly and the way of the future. Solar-powered flight has come a long way since the concept of solar cells on planes was thought of in the 1970s.
